TITLE OF IN	VENTION:	ARRANGEMENT.	SYSTEM	AND	METHOD	FOR	VECTOR	PERMUTATI	ION I	IN	SINGLE-INSTR	UCTION	

MULTIPLE-DATA MIRCOPROCESSORS

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1510	\$300	\$0	\$1810	09/02/2010

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 1SI. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and I/2 the ISSUE FIEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail Commissioner for Patents P.O. Box 1450
Alexandria, Virginia 22313-1450

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 276 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 276 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

EXAMINER'S AMENDMENT

The IDS filed 4/27/2010 has been considered.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Dolezal on 6/12/2009.

The application has been amended as follows (note, claims not mentioned remain as they were presented in the claims submitted on 01/21/2008):

 (Currently Amended) An arrangement for vector permutation in a singleinstruction multiple-data microprocessor, the arrangement comprising:

a vector register file;

a permutation logic block coupled to receive and permutate vectors from at least one vector register of the vector register file according to control parameters, the permutation of the vectors being [[as]] a side operation of an instruction;

a plurality of control registers separate from the vector register file, each of the plurality of control registers being coupled to selectively provide control parameters to the permutation logic block; and

a controller coupled between the plurality of control registers and the permutation logic block and arranged for selecting <u>by an order</u> one of the plurality of control registers and for providing the control parameters from the selected one of the plurality of control registers to the permutation logic block.

(Currently Amended) A single-instruction multiple-data microprocessor vector permutation system comprising:

at least one vector register;

a vector register file;

a permutation logic block coupled to receive and permutate vectors from the at least one vector register of the vector register file according to control parameters, the permutation of the vectors being [[as]] a side operation of an instruction;

a plurality of control registers separate from the vector register file, each of the plurality of control registers being coupled to selectively provide control parameters to the permutation logic block; and

a controller coupled between the plurality of control registers and the permutation logic block and arranged for selecting <u>by an order</u> one of the plurality of control registers and for providing the control parameters from the selected one of the plurality of control registers to the permutation logic block.

4. (Currently Amended) The arrangement of claim 1 wherein the controller controller means includes at least one counter arranged to provide the order as a sequential order for selecting one of the plurality of control registers.

Application/Control Number: 10/531,756

Art Unit: 2183

5. (Currently Amended) A method for vector permutation in a single-instruction multiple-data microprocessor, the method comprising the steps of:

providing vectors to be permutated in a vector register file; providing a plurality of control registers separate from the vector register file;

providing a controller coupled between the plurality of control registers and the permutation logic block;

selecting <u>by an order</u> one of a plurality of control registers, each control register containing parameters for determining permutation characteristics; and

permutating the vectors as a side operation of an instruction according to the parameters of the selected control register.

- (Currently Amended) The method of claim 5 wherein the step of selecting <u>by an order</u> further includes the following of a sequential order of the plurality of control registers.
- 15. (Currently Amended) The system of claim 2 wherein the controller means includes at least one counter arranged to provide <u>the order as</u> a sequential order for selecting one of the plurality of control registers.
- 28. (Currently Amended) An arrangement for vector permutation in a single-instruction multiple-data microprocessor, the arrangement comprising:

a vector register file;

Application/Control Number: 10/531,756 Page 5

Art Unit: 2183

a permutation logic block coupled to receive and permutate vectors from at least one vector register of the vector register file according to control parameters, the permutation of the vectors being a side operation of an instruction;

a plurality of control registers separate from the vector register file, each of the plurality of control registers being coupled to selectively provide control parameters to the permutation logic block; and

a controller coupled between the plurality of control registers and the permutation logic block and arranged for selecting by an order one of the plurality of control registers and for providing the control parameters from the selected one of the plurality of control registers to the permutation logic block wherein the controller includes at least one counter arranged to provide the order as a sequential order for cyclically sequencing through the plurality of control registers.

29. (Canceled)

3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose the use of a vector permutation operation being performed as a side operation of another instruction wherein the vector register file and control registers are in separate register files and wherein there is a controller that selects the control registers in an order to control the vector permutation. While there is prior art of record to suggest vector permutations and the notion of side operations, nothing in particular points to these being done together, much less in the way claimed, specifically with the

Application/Control Number: 10/531,756

Art Unit: 2183

selection mechanism being in order (e.g. a sequential order as per dependent claims).

One of ordinary skill in the art would not have reason or motivation to combine any prior art of record to obtain the invention as disclosed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to William B. Partridge whose telephone number is (571) 270-1402. The examiner can normally be reached on Mon-Fri 2PM - 6PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Chan can be reached on (571) 272-4162. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
